Product Description

This workbench comes with a 1-1/4" thick conductive white plastic top. It is ideal for controlling static electricity. The properly grounded work surface rapidly bleeds off static build-up and prevents damage to sensitive electronic circuitry during assembly. It dissipates 5000V static charge in 0.01 sec with surface resistance of 10^{10} Ω. This workbench is easy to clean with soap and water. The workbench complies with MIL-B81705B and 101B, 101C, Method 4046. The bench stringer comes with mounting hardware to assemble legs to the

benchtop.
