Global Industrial™ Forklift Blue Arrow Light with Flash

★★★★★ (0)

Ships Same Day

Product Description

Standout Features:

✓ Compatible for the front and/or rear of any forklift or industrial vehicle.
✓ Animated lights visibly warn that a forklift is approaching.
✓ LED light encased in a strong aluminum housing with a polycarbonate lens.

Promote worker & pedestrian safety in your facility with the Global Industrial™ Forklift Blue Arrow Light with Flash. The bright arrow on the floor is clearly visible to pedestrians,

machines and vehicles in the area, regardless of the ambient noise, alerting them to the nearby presence of the forklift. When the LED blue arrow light with flash is mounted to a forklift or other moving vehicle, it projects a blue arrow that is shined on the floor to warn nearby people the forklift is coming and the arrow shows which direction the forklift is going. Lights are animated, flashing to make it easier to be spotted. The LED lights yield 900 lumens are enclosed in an aluminum housing with a polycarbonate lens. The LED forklift safety light uses the vehicle electrical power to operate and can be installed on the front and/or rear of any forklift, sweeper or industrial vehicle (configured for 10 Volt to 80 Volt DC input range, with reverse voltage protection). Universal stainless steel mounting bracket allows for easy installation. Mounting kit sold separately.

- 1 Year Limited Warranty.
- Working environment temperature is -40 to 176° F.
