GLOBAL INDUSTRIAL™ PALLET JACK TOE GUARD PROTECTOR

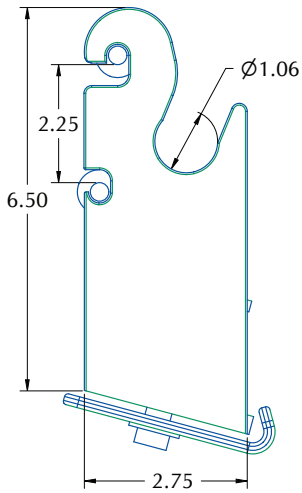

800540

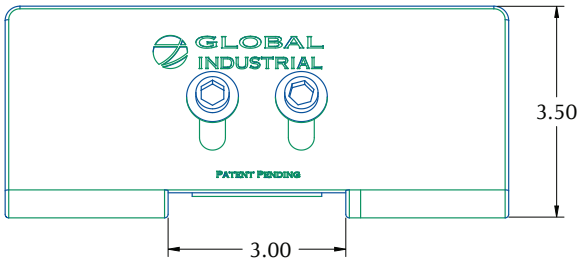

Toe guards attach onto a pallet jack truck and acts as a safety barrier between the user and the jack's wheels to help prevent injuries and ensure uninterrupted travel. It installs behind the rear steering wheels to reduce the exposure associated with foot-rollover injuries to operators or others and is reusable and transferable between pallet trucks. Utilizing the guard also helps divert dirt and debris from jamming or blocking the pallet truck's steering wheels for smooth travel.
